DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: There is prior art regarding semiconductor devices comprising beveled edges. See, for example, that Raiser et al. (US 6049124) discloses a chip with beveled edges 512 having an active surface 316 and a corresponding back surface, wherein the active surface has beveled edges.

Also, Farnworth (US 6252302) discloses beveled edges. However, Farnworth's chip 76 (referred to as die/dice in the patent) may be illustrated as having an active surface with a beveled edge (Figs. 4&6), but this feature is not referred to anywhere in the written description. Therefore, the examiner was unable to rely upon this reference since she would be relying upon assumptions, and she would be unable to make an appropriate obviousness statement based on assumptions, and not based on a disclosure itself.

As described in the independent claims 9 and 14, the invention teaches a package or semiconductor device that comprises a die pad, a plurality of leads, and a chip including an active surface with beveled edges, and a back surface attached to the die pad via an adhesive material. The adhesive material covers the whole back surface of the chip and the side surfaces of the chip that connect its back surface to its active surface. As disclosed on, for example, page 6:lines 8-10 of the specification the

provision of beveled edges favorably prevents coverage of the active surface of the chip by an overflowed adhesive material. In addition to the above, claim 14 recites the stack of a plurality of chips on one another on the die pad.

The above features in combination with all other specific structural limitations in the claims are neither obvious over nor anticipated by the prior art of record, which fails to, either alone or in combination, anticipate the device as claimed. Hence the Notice of Allowability found herein.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
